

A Step-by-Step Guide for Getting a Grant

Welcome to the My Safe Florida Home Program, a state initiative that helps homeowners strengthen their homes and save on insurance. Follow the steps below to begin your application and move through the process successfully.

ALL STEPS BELOW ARE MANDATORY

- 1 Create Your Account** - Visit MySafeFLHome.com to create your new MSFH Portal Account.
- 2 Complete the Prioritization Questionnaire** - Once registered, you'll see the Prioritization Questionnaire in your account. This short survey is mandatory and applicants are sorted into Prioritization Groups based on the age, household, and income data they provide. When submitted, your status will automatically update to "Prioritization Questionnaire Submitted."
- 3 Wait to Be Placed in an Inspection Group** - Our system organizes homeowners into Inspection Groups (1–5). When you're placed in a group, your status will update to **Inspection Group 1, 2, 3, 4, or 5**. You'll receive an email notification confirming your group placement.
- 4 Complete the Inspection Application** - Once assigned to an inspection group, you can access and complete your inspection application inside your applicant portal account.
- 5 Apply for a FREE Wind-Mitigation Inspection** - After your inspection application is submitted and approved, an authorized Florida Wind-Mitigation Inspector will be assigned to your property. You'll be contacted to confirm your inspection date and time.
- 6 Review Your Inspection Report** - After your inspection, you'll receive a detailed report outlining:
 - Recommended improvements to strengthen your home
 - Potential eligibility for up to \$10,000 in grant funding
- 7 Apply for a MSFH Grant (If Eligible)** - If you wish to proceed with the recommended improvements, you may **opt-in through Your Applicant Portal** to receive access to the Grant Application. Once submitted, the Grant Application will be reviewed to determine eligibility for approved upgrades, such as:
 - Opening Protections (windows & ext. doors)
 - Opening Protections (garage doors)
 - Secondary Water Resistance (SWR)
 - Roof-to-Wall Attachments
 - Roof-to-Deck Attachment

Remember to Check Your Applicant Portal Account Often.

Applicant status and group assignments are updated several times each week.
